

our team for your special cargo

Velebit is the biggest mountain in Croatia. Strong and proud just like our company's foundation. Our strong team with a strong fleet of trucks, trailers and cranes is able to meet the most challenging requirements of our clients. Oversized or heavy – we are ready!

CHOOSE THE BEST - CHOOSE

Velebit is a Croatian company with extensive experience and references in transporting and handling Heavy & Special cargo on the European continent. Established in 1992, Velebit has been working as part of the Liburnia group since 2021. The company's foundations are knowledge and teamwork and we believe our methods and mind-set can satisfy even the most challenging demands. We continuously invest in our fleet and personnel and we aim to set new industry standards. Together with the Liburnia group, Velebit is an environmentally friendly company, mainly through the mutual environmental initiative Backtoblu (www.backtoblu.com).

Special & heavy cargo transport

Since its establishment in 1992, the focus of Velebit has been on transporting and manipulating heavy and oversized loads. The company operates throughout the European market. Our fleet consists of trucks up to 680HP and over forty semitrailers with different technical characteristics and capacities. With our 16-axle line modular trailer, we are able to transport loads up to 200 tons' unit weight. Our drivers are well experienced with a long-lasting career in Velebit.

Cargo handling

Our experienced team, together with our cargo handling equipment, is able to manipulate cargoes up to 300 tons' unit weight and we are able to perform lifting and jacking & skidding operations in all conditions.

General cargo transport

In addition to special cargo transport, we also offer a transportation service for a variety of cargos with our open and closed semi-trailers on the European market.

Route & project planning

The focus of our clients should be on producing the best product, and we are here to find the best possible route for them. We operate with heavy and oversized cargoes, but sometimes finding the best route can be challenging. We love challenges! We are here to design workable solutions for our clients, and to transport and handle their cargoes in the safest and most economical way. In order to have full control we also offer in-house technical escorts and permit arrangements.
